

[Android]

snippet.java

```
Date mDateStart = new Date();
String date = String.format("%d.%d.%d", mDateStart.getYear(),
mDateStart.getMonth(), mDateStart.getDate());
```

snippet.java

```
Calendar calStart = Calendar.getInstance();
Date mDateStart = new Date();
calStart.setTime(mDateStart);
System.out.println(calStart.get(Calendar.YEAR));

String date = String.format("%d.%d.%d", calStart.get(Calendar.YEAR),
calStart.get(Calendar.MONTH), calStart.get(Calendar.DAY_OF_MONTH));
```
