

# dotimes

```
(dotimes (variable value)  
  statement)
```

## Example

```
(ns clojure.examples.hello  
  (:gen-class))  
  
;; This program displays Hello World  
(defn Example []  
  (dotimes [n 5]  
    (println n)))  
(Example)
```

## Output

```
0  
1  
2  
3  
4
```
