

# Fastapi Request

[fastapi](#), [request](#)

```
from starlette.requests import Request

@router.get('/predict/lgb')
async def predict_lgb(request: Request, background_tasks: BackgroundTasks,
                      db: AsyncIOMotorClient = Depends(get_mongodb)):
    # background_tasks.add_task(predict_run_task, db)
    data = {
        'url': request.url
    }

    return JSONResponse(content=jsonable_encoder(data))
```
