Realtime Database 규칙

```
{
  "rules": {
    ".read": true,
    ".write": true,
    "2016" : {
      "site-moa" : {
        "shop-overseas" : {
          ".indexOn" : "dateFormat"
        },
        "shop-korea" : {
          ".indexOn" : "dateFormat"
        }
      }
    }
  }
}
```

rules에 모두 읽고 쓸 수 있도록 true를 설정한다.

인덱스 설정을 위해, .indexOn를 입력한다.

Understand Firebase Realtime Database Rules

[more](<https://firebase.google.com/docs/database/security/#section-overview>)

Rule Types	Desc
—	—
.read	Describes if and when data is allowed to be read by users.
.write	Describes if and when data is allowed to be written.
.validate	Defines what a correctly formatted value will look like, whether it has child attributes, and the data type.
.indexOn	Specifies a child to index to support ordering and querying.
