flutter store

[flutter](#), [store](#)

BLoC Pros:

- **Easy to separete UI from business logic**
- **Flexible**
- **Easy to test**
- **Good performance**

BLoC Cons:

- **Hard to understand**
- **A lot of boilerplate code because of Streams declarations**
- **There's no standard implementation**

MobX Pros:

- **Simple to learn and use**
- **Less boilerplate because code generation**
- **Easy to test**
- **Good performance**
- **Good documentation and standards**

MobX Cons:

- **Code generation is slow because build_runner**
- **Code generation can not please some**
