system state

```
(defn system-state []  
  (or @core/system state/system))
```

system.edn

```
{:system/env #profile {:dev :dev  
                       :test :test  
                       :prod :prod}  
  
 :secrets #include #profile {:dev "secrets_dev.edn"  
                             :test "secrets_test.edn"  
                             :prod "secrets_prod.edn"}  
}
```
