

kubectl config

```
> k config get-contexts
```

CURRENT	NAME	CLUSTER	AUTHINFO
	kubernetes-admin@kubernetes	kubernetes	kubernetes-admin
*	minikube	minikube	minikube
	default		

```
> kubectl config rename-context kubernetes-admin@kubernetes superuser
```

Switch namespace

```
kubectl config set-context $(kubectl config current-context) --namespace=dev
```
