

mapper_util.dart

flutter, dart, json, mapper, util

```
import 'package:dart_json_mapper/dart_json_mapper.dart';

class MapperUtil {
  static List<T>? fromMapList<T>(data, type) {
    if (data == null || data[type] == null) return null;
    return data[type]
      .map((e) {
        return JsonMapper.deserialize<T>(e);
      })
      .toList()
      .whereType<T>()
      .toList();
  }

  static T? fromMap<T>(data, type) {
    if (data?[type] == null) return null;
    return JsonMapper.deserialize<T>(data[type]);
  }

  static toMap(obj) => JsonMapper.toMap(obj);
}
```
