

Redis

- [iredis](#)
- [redis client](#)

connect

```
redis-cli -h YOUR-DOMAIN -p PORT -a PASSWORD
```

redis docker

```
docker run --name redis -d -p 6379:6379 redis redis-server --requirepass "SUPER_SECRET_PASSWORD"
```

redis compose

```
version: '3.0'

services:
  redis1:
    image: redis
    command: redis-server --requirepass changeme --port 6379
    restart: always
    ports:
      - 6379:6379
```

- <https://m.blog.naver.com/wideeyed/221974209760>

redis

```
brew install redis
```

redis

```
redis-server
```

redis

```
$ redis-cli
127.0.0.1:6379> set test 1234
OK
127.0.0.1:6379> get test
"1234"
```

redis-server가

node

```
$ npm start

> node_redis@1.0.0 start /Users/jace/Workspace/docker/node-redis
> node app.js

Listening 8081 port
```

- `docker build -t jacegem/node-redis:1.0 .`
- `docker run jacegem/node-redis:1.0`
