```
class _SliverAppBarDelegate extends SliverPersistentHeaderDelegate {
  _SliverAppBarDelegate({
    @required this.minHeight,
    @required this.maxHeight,
    @required this.child,
  });
  final double minHeight;
  final double maxHeight;
  final Widget child;
  @override
  double get minExtent => minHeight;
  @override
  double get maxExtent => math.max(maxHeight, minHeight);
  @override
  Widget build(
    BuildContext context, double shrinkOffset, bool overlapsContent)
  {
    return new SizedBox.expand(child: child);
  }

  @override
  bool shouldRebuild(_SliverAppBarDelegate oldDelegate) {
    return maxHeight != oldDelegate.maxHeight ||
      minHeight != oldDelegate.minHeight ||
      child != oldDelegate.child;
  }
}

...

SliverPersistentHeader makeHeader(String headerText) {
  return SliverPersistentHeader(
    pinned: true,
    delegate: _SliverAppBarDelegate(
      minHeight: 60.0,
      maxHeight: 200.0,
      child: Container(
        color: Colors.lightBlue, child: Center(child:
Text(headerText))),
    ),
  );
}
```

```
);  
}  
  
...  
  
makeHeader('Header Section 1'),
```
