

Svelte Store

custom stores

```
import { writable } from 'svelte/store';

function createCount() {
  const { subscribe, set, update } = writable(0);

  return {
    subscribe,
    increment: () => update(n => n + 1),
    decrement: () => update(n => n - 1),
    reset: () => set(0)
  };
}

export const count = createCount();
```

```
<script>
  import { count } from './stores.js';
</script>

<h1>The count is {$count}</h1>

<button on:click={count.increment}>+</button>
<button on:click={count.decrement}>-</button>
<button on:click={count.reset}>reset</button>
```

writable stores

- <https://svelte.dev/tutorial/writable-stores>

```
<script>
import { writable } from 'svelte/store';

export const count = writable(0);

const unsubscribe = count.subscribe(value => {
  count_value = value;
});

function decrement() {
```

```
    count.update(n => n - 1);  
}  
  
function reset() {  
    count.set(0);  
}  
</script>
```
