

# syncNoteList

sync, note, list

```
Future<List<Note>> syncNoteList(List<Note> noteList) async {  
    const type = 'logSyncNoteList';  
  
    var dataList = noteList  
        .map((e) => NoteInput()  
            ..id = e.id  
            ..name = e.name  
            ..userId = e.userId  
            ..noteType = e.noteType  
            ..isActive = e.isActive  
            ..createdAt = e.createdAt  
            ..updatedAt = e.updatedAt)  
        .toList();  
  
    List<Input> inputs = [TypeListInput(Fields.input, dataList)];  
    return await api.mutateList(type, fields, inputs: inputs);  
}
```
