

Terraform

install

- <https://learn.hashicorp.com/tutorials/terraform/install-cli?in=terraform/aws-get-started>

```
brew tap hashicorp/tap
brew install hashicorp/tap/terraform
```

S3

- modules
 - s3
 - main.tf
 - variables.tf
 - outputs.tf

```
$ cat modules/s3/main.tf

resource "aws_s3_bucket" "www" {
  bucket = "www.${var.domain_name}"
  acl    = "public-read"
  policy = <<POLICY
  {
    "Version": "2012-10-17",
    "Statement": [
      ...
    ]
  }
  POLICY
  ...
}
