

# amplify auth

## sign up

```
await Amplify.Auth.signUp(  
  username: 'username@gmail.com',  
  password: 'password',  
  // options: CognitoSignUpOptions(userAttributes: userAttributes)  
);
```

## confirm sign up

```
await Amplify.Auth.confirmSignUp(  
  username: "username@gmail.com",  
  confirmationCode: "999699",  
);
```

## sign in

```
var result = await Amplify.Auth.signIn(  
  username: 'username@gmail.com',  
  password: "password",  
);
```

## reset password

```
var result = await Amplify.Auth.resetPassword(  
  username: 'username@gmail.com');
```

## confirm reset password

```
var result = await Amplify.Auth.confirmResetPassword(  
  username: 'username@gmail.com',  
  newPassword: 'password',  
  confirmationCode: "704501");
```

## get current user

```
var result = await Amplify.Auth.getCurrentUser();
```
