

BaseInput

```
import 'package:dart_json_mapper/dart_json_mapper.dart';

@jsonSerializable
abstract class BaseInput {
  @JsonProperty(ignore: true)
  String type = "BaseInput";

  @JsonProperty(ignoreIfNull: true)
  int? order;

  @JsonProperty(ignoreIfNull: true)
  String? desc;

  @JsonProperty(ignoreIfNull: true)
  String? imageBase64;

  BaseInput({required this.type});

  setOrder(String text) {
    if (text.isNotEmpty) {
      order = int.parse(text);
    }
  }

  @JsonProperty(ignoreIfNull: true)
  int? createdAt;
  @JsonProperty(ignoreIfNull: true)
  int? updatedAt;
}
```
