

Dio

```
try {  
  var dio = _getDio();  
  Response response = await dio.post(url, data: data);  
  return response.data;  
} catch (e) {  
  debugPrint('[API Error] fetchResponse : $url : $e');  
  if (e is DioError) {  
    JsonEncoder encoder = new JsonEncoder.withIndent('  ');  
    Map decodeMap = json.decode(e.response.toString());  
    String prettyprint = encoder.convert(decodeMap);  
    debugPrint(prettyprint);  
  }  
  return null;  
}
```
