Graph database

A Python framework for graph databases

- neomodel https://neomodel.readthedocs.io/en/latest/relationships.html
- django-neomodel https://github.com/neo4j-contrib/django-neomodel
- bulbflow http://bulbflow.herokuapp.com/overview/

Visualization

Data Modeling

- Whiteboard friendly close to but Pragmatic Conceptual model
- Take into account how you are traversing data
- Use your Relational model to start
- Iterate, Iterate, Iterate

Data Modeling Concerns

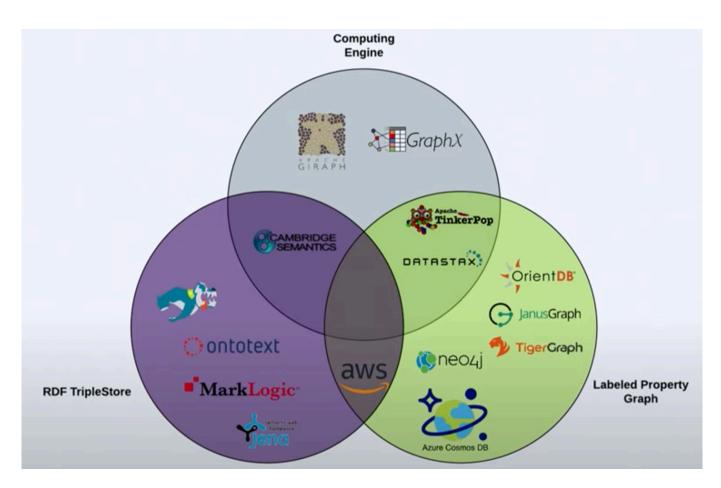

- Don't use Symmetric Relationships
- Look out for Hidden/Anemic Relationships
- Look for Supernodes
- Schema Use it and make it general
